## Chemical Cleaning

- Waste disposal was a challenge during chemical cleaning of the systems. Trans Asia has managed it with additional storage capacity and proper coordination with third party waste disposal vendor.
- Being a expansion project green and brown filed work areas was a challenge. Trans Asia has performed amine degreasing for interconnecting piping of amine system with a length of 1.5kms.
- For longer lengths of piping by using suitable sized equipment spread temperature has been maintained to complete the work successfully.
- Trans Asia has utilized its in-house resources to complete the work.
